PRODUCT/SERVICE INFORMATION

*Providing quality service for
over 16 years!*

Telephone 413-589-7900

INTERIOR & EXTERIOR PAINTING

We service both residential and commercial customers and use only high quality materials. Our range of services from general painting and refinishing to restoration and faux finishing make us the right painters for any job. No job is too big or too small and each receives the attention to detail that we give on a continual basis.

As preparation is the most important aspect of any successful paint job, you will be educated on the process and given our professional recommendations on how best to

approach the job. Ultimately, we are armed with the best and most current information available to make that informed decision.

We also offer carpentry such as wood replacement, expert finish carpentry, installation of cabinets, doors, etc. Drywall and plaster repair and drywall replacement are another facet of our business.

We're not your average painting company!

WALLPAPERING

Our team includes skilled wallpaper hangers. We can repair or replace your existing wall covering or just remove that old wallpaper that's outdated. We repair walls to ready them for paint or wallpaper, so erase that mind set that once you've wallpapered, you always have to wallpaper.

We work with all types of paper including wood laminate, which is popular with commercial decorators. We work hand in hand with the private homeowner or the corporate decorator to achieve the desired result.

ELECTROSTATIC PAINTING

We are one of few in the Western MA area who skillfully perform this specialty service. Electrostatic painting is a paint to metal process that involves a magnetic charge. As a result, the bond is so strong that the paint should hold up for years without chipping or peeling. Examples of this type of work are ATM machines, flag poles, metal cabinets, metal office furniture and file cabinets, factory machines, signs, metal fencing, etc.

Holyoke Mall Sky Dome

As this type of painting is utilized more by the commercial customer, there are a few applications for the residential customer to take advantage of as well.

COMMITMENT TO QUALITY

Our commitment to quality is surpassed by no other. We work closely with the customer before, during and after the job to resolve any and all issues and ensure your complete satisfaction. Our dedicated and knowledgeable staff possess not only the skill to complete the job, but the attitude of the true craftsman who takes pride in his work and a job well done. These are rare qualities in today's marketplace.

Ongoing professional development is promoted and encouraged in order to keep abreast of current trends in the painting and wallpapering fields.

We are fully licensed and insured and provide services in both MA and CT as well as other parts of the Northeast.

References will be provided upon request but also take notice, if you see one of our signs, of the top-quality work we perform.
